

F3-STATIC-ABOUT-SENTINEL

About page of the deterministic static fixture. Three paragraphs of fixed prose follow so the extracted PDF text has enough volume for a meaningful similarity comparison.

█ The render path must not alter content: what discovery found is what the converter renders, one URL at a time, through one browser.

Second paragraph: the page-quality chain handles cookie banners, sticky headers, lazy-loading scroll, and viewport normalization before the PDF is produced at the tail of the navigation hook.

Third paragraph: nothing on this page changes between runs, which makes any drift in the extracted text a render regression by definition.
